

Hi guys,

Here are Monday's three tasks we have set for you:

English

Write the rest of the story (**without watching the remaining part of the clip**), including where they go and who they see.

Think about whether they continue their journey with just the two of them or if more houses join them on the way. Where are they going and why? How will you end your story?

Don't forget to use different sentence starters:

-Later that day...

-That night...

-Suddenly...

-Eventually...

Remember to make it interesting by using verbs, adverbs and adjectives. Once you have written the rest of the story go to the clip and see how it continues. Was your version similar? <https://www.literacyshed.com/homesweethome.html>

Extension: Improve your writing by using a thesaurus (up-level your verbs, adverbs and adjectives).

Maths

What is a right-angled triangle? Draw one

What is an acute angle? Draw one

What is an obtuse angle? Draw one

Write down 3 times where the hands on the clock make an acute, obtuse and right-angle.

Can you find any of those angles around your house? Write down what you found and which angle it has.

Extra activity: Play 6x table bingo with your mum, dad or brother/sister, but watch this first! <https://www.youtube.com/watch?v=f2JdnZbB2dg>

Science

Find out about **pollination**:

What does it mean?

What happens in the process (write about the stages)?

Why is it important for pollination to take place?

Write the above in your own words; the links below might help you.
