

Birch and Tulip Home Learning for Monday 15th June

In **Maths**, now that you have used length words and have used same sized objects to measure. Let's move on to using a ruler. You will need a ruler showing centimetres. We write this as cm. One very important thing to remember is that we always start measuring from 0 cm.

What is the length of the chocolate bar?

The chocolate bar is cm.

Now you are ready to practise measuring different objects using your ruler.

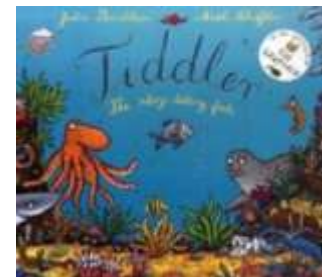

Challenge: Can you find 2 objects **shorter than 10cm**, 2 objects **longer than 20cm** and 2 objects that are the **same** length?

In **English**, let's look at another fantasy world setting, 'Tiddler' by Julia Donaldson. It's a story about a story telling fish!

If you don't have it at home, it's available on YouTube. Imagine that you could go diving underwater.

What might you see? What words could you use to describe things?

Challenge: Make up another 'tall-tale' that Tiddler might tell. How would he explain this to his teacher?

In **Art and Design**, can you design and make your own junk model mammal?

Don't forget to add all its special features!

Have fun, love Miss Trayer and Mrs Vitty
