Topic

Last week, in honour of World Ocean Day our Topic lessons focussed on our planet's oceans and seas around the world. This will continue this week as we look a bit closer at some of the wonderful marine life and creatures that live in the ocean. Today your task is to create your own ocean food chain!

Food chains show each part of marine life's role in the ocean (there is an example below!). Cut and stick the key words where you think they belong under the pictures of marine animals. I will include the correct answers in Thursday's Home Learning email!

(This is a cut and paste activity – if you do not have a printer, you can draw the pictures of the animals and then write the answers underneath your pictures)

Art

We are going to change things up slightly this week as you have all been working hard on the Science postcards but possibly want a break from those. Your Art task this week is to create a nature collage (**there are some examples below**). Try and get outside if you can and collect things (leaves, twigs, parts of plants that have fallen off) to stick onto a piece of card or paper. If you are not able to get outside, you can draw a scene from the natural world of your choice. Have fun!

IMPORTANT TIPS TO REMEMBER:

- Write the date (DD/MM/YY) at the top of each piece of work you do.
- Write the title of the work underneath the date.
- If can, send me a photo of your work or if you can complete it on a computer, send the file to me so I can have a look at your work.
- If you have any issues with the work set, please email me straight away and I will try to get back to you as soon as possible.
- I will send the next set of work to you on Monday.
- This work is for you to do at your own pace. Please do not feel like you must complete everything straight away.

Write decimals

- 1 Make the number represented on each of the place value charts. Complete the sentences to describe each number.

Compare answers with a partner.

5 Complete the part-whole models.

6 Here is a part-whole model.

Partition 0.72 in three different ways and complete the number sentences.

$$\square + \square = 0.72$$

$$\square + \square = 0.72$$

$$\square + \square = 0.72$$

7 Eva is asked to show 10 tenths on a place value chart.

Here is her answer.

Ones	Tenths	Hundredths
	●●●●●●●●●●	

Is Eva correct?

8 Here are five number cards.

Annie, Rosie, Jack, Dora and Whitney take one card each.

Use the clues to work out which number they each have.

Annie: My number has 5 hundredths.

Rosie: My number is twice as much as Dora's.

Jack: My number has 2 zero place holders.

Whitney: My number is less than Jack's.

Dora: My number is more than Jack's.

- 5 Ron and Amir have each made a number using counters on a place value chart.

Ron's looks like this:

Amir's looks like this:
