

Reception Home Learning

Thursday 9th July

Hi Lovely children, are you having fun? Here are some more fun activities!

Dinosaurs

1. Can you find out some interesting facts about dinosaurs? Can you share some of these facts with your family? Make a big, beautiful picture about your favourite dinosaur and write 2 facts about it.

2. This week is dedicated to 'Sports week!' We hope you have been trying some of the physical challenges that we sent you on Monday. Sport helps us to keep our body healthy, but we also need to eat good food to support our body.

Pretend that your body is a racing car. If you want to look after your car, you need to give it good fuel, so that it will go faster for longer. It is important to eat lots of different food, but some food should be eaten every day, whereas some should be saved for special occasions and treats. Can you tell an adult which food is good to have every day and which food is better to have only on special occasions?

3. It has been a tricky time during lockdown and whilst we are waiting for it to be safer for us to do more outings and trips with our families, we could make a wish list!

Where would you like to go when it is safe to do so?

Which places would you like to visit?

What have you missed doing?

Write a wish list with your family.

Have fun!

Have Fun, Love From Mrs Foddai, Mrs Freeman and Mrs Deojee
