Learning YR5

Monday 27th April

Hello everybody- hope you are all well. Well done to all the children who have sent replies and photos of their learning - we have really enjoyed seeing them. Today, I have set another three tasks and a specific question for you all to answer- let's see if **everyone** can answer...

Question: Name one thing that you remember about the Mayans?

Now here are your 3 activities:

1. In science we are observing forces. Can you explain what a force is? What are forces measured in? Can you find out about other types of forces? On the forces activity draw arrows to indicate the forces present.

Extension: Who discovered gravity?

2. English: write a character description- it could be about any of the characters we have read about eg. Charlie and the Chocolate Factory or any other characters that you have read about... keep the character's name until the end so I can guess who it might be!

Extension: To concoct a quiz about your character

3. Maths: follow this link to lesson on adding and subtracting decimals at White Rose

<https://whiterosemaths.com/homelearning/year-5/>

I have also attached the lesson if you wish to print them out

Extension: Try the Ancient Greece brain teasers. I have attached the sheets.

I will send out three more activities next Thursday. Remember to keep sending in your replies and photos - we will look forward to hearing from you, love from Ms Malyon, Mrs Williams, Ms Baker and Ms Brett.
