## Learning YR5

Thursday 30th April

Hello everybody- we hope you continue to remain safe and well.

Well done to all the children who have sent replies and photos of their learning - we have loved seeing them. I hope you all enjoyed our school video- it was good to see everyone. Today, I have set another three tasks and another question for you all to answer- let's see if **everyone** can answer...

Question: Tell us something you remember about any of our school trips?

Now here are your 3 activities:

1. In science we are investigating air resistance, make the paper helicopter and carry out the investigation. Sheet and template attached.

Extension: Does the size of the helicopter alter the speed? Can you make it slower/faster? What else could you make to show air resistance?

Microsoft PowerPoint  
Presentation

Here is a powerpoint attached too

2. English: The Underground Challenge. Answer the questions by using the map of the London Underground. What else can you research about the London Underground?

Extension: To try out some of your own route destination questions on your family.

3. Maths: follow this link to lessons on adding and subtracting decimals at White Rose –continue with these lessons- sheets were attached on Monday 27th

<https://whiterosemaths.com/homelearning/year-5/>

Extension: Try to solve this London Underground Mystery Maths Game- attached

I will send out three more activities next Monday. Remember to keep sending in your replies and photos - we will look forward to hearing from you, love from Ms Malyon, Mrs Williams, Ms Baker and Ms Brett.
