

With an adult can you search online for information about different kind of vehicles? Which interesting fact can you find?

Part 1:

Can you build a vehicle using materials and junk modelling you have at home? How are going to realise it? Draw your model in the book first.

Part 2:

Now that you have finished building your vehicle you can measure it. What system will you use? Hands? Feet? Metres? Sticks? Straws? Pencils?..... Please choose two different ways of measuring your model and write your results on your book.

In class we have been talking about where the different kinds of vehicles travel (air, water or land). Can you make a picture showing where those vehicles suppose to go?

In class we have been looking at different sounds for our vehicles.

For example the train makes ch- ch- noise. How many words can you find with that sound?

Or challenge yourself a bit more: Car has the AR diagraph. How many words can you find with that sound?

Draw a picture of your favourite vehicle. Can you describe it? What colour is it?

Transport

Imagine that you are on a journey: What vehicle are you going to use? Where would you like to go? What will you see from the window? Write a little story about your incredible journey

We have been adding numbers together using numbers up to 10.

Can you solve these operations?

$3+5=$

$7+3=$

$2+3=$

$5+5=$

$8+2=$

$9+1=$

$6+4=$

$4+2=$

What strategies did you use?

Draw a poster against pollution. Why is pollution not good for us? What can we do to reduce it?

How many vehicles can you see in one day? Can you write their names?
